

# Customer file

---

## Always everything online – always everything in view.

The customer files are the basis for a close and open cooperation with our customers and documents the collusion of the project. In addition to the agreements, the customer file includes:

- all information about the project status as well as the status
- contents of the last software delivery
- planned changes to the next deliveries
- current issues

As a single point of information, the customer file provides both access to our standard- as well as project documentation and is therefore directly integrated into our application. Many of our customers can dispense with their own application documentation because all adjustments are documented in the course of the project. As a result the individual documentation is available in the customer file at the end of the project.

Access to the project files is easy from the UI:
